We are sending you a DNA kit for your

American Warmblood \_\_\_\_\_

North American Sportpony. \_\_\_\_\_

Below are the steps that will make it an easy and uncomplicated process.

The first page with the AWR logo on it tells you to send the hair sample to UC Davis no later than 2 months after the date of issue of the form. After that date your kit is automatically purged and you will have to purchase a new one from us. Please try to avoid this situation by sending the sample off asap.

Return the lower half of this page to AWR/NASPR via standard mail.  
NO *express* or *registered* necessary!

On the page designated as DNA submission form, place the hair sample (about 40 hair, best from the mane) onto the bottom part as shown and secure it with a tape. Fold it and send it off in a standard envelope. There is no need to send it via a Courier service - unless you want to expedite delivery.

Make NO additions or modifications to the owner part in the middle of the form. The address line shows the date when the kit was issued.

If you think an error has occurred on the form, please contact the AWR office. The office staff will then check and, if necessary, make any corrections online on the UC Davis website.
